

Strategic Future Plan of The SNTD Women's University

SNTDWU envisions growing in area of research and academics, where each department of the University sees 100 percent occupancy of their available seats for the students in the multidisciplinary and interdisciplinary programmes, and produce the world class quality in teaching learning, which will make our journey more effective and impactful. The strategic plan for the next five years is documented in our Vision Document. Besides that every department has its own future plans for growth and expansion. Below is a summary of future plans of all the Departments of the university:

2022-2023

SNTDWU plans to revise and revisit its curriculum for the entire Undergraduate and Postgraduate courses and programmes to meet the guidelines of the National Education Policy 2020.

University plans to offer skill based programmes which will not only enhance the employability among the youth but also produce number of entrepreneurs who would support others by creating jobs for them. Many value-added innovative programmes will be introduced to inculcate human values of sensitivity and inclusivity in our youth.

University plans to create novel employment opportunities in the area of languages namely Sanskrit , Hindi , Marathi, Gujarati and English teaching. Cultural entrepreneurship, corporate communication, content creation/development, film/cultural criticism, translation studies, digital humanities, etc. will also be encouraged.

2023-2024

SNTDWU has always contributed in the national development process by educating women of India. University is focused on promoting STEM and encouraging students to opt for STEM degree. University aims to increase and help the women to choose the STEM study.

University will have more number of MOUs with other Universities at national and international level to promote academia and to have strong placements, internship, training, visits etc. for the students as well as for the faculty.

Faculty development programmes will be organized often at National and International level, where an enriched platform will be provided to different stakeholders for their inquisitive thirst of exploring exemplary concepts under one roof.

Exclusive Placement Cell will be established for students to enhance their job skills and prepare them for campus placement.

There will be a Centre for Academic Leadership and Management where academic leaders will be given effective and impactful leadership and managerial training to meet the objectives of NEP-2020.

2024-2025

SNDTWU will focus on arranging the rigorous training programmes on continuous basis for preparing women students for SET, NET, UPSC, PCS exams at state levels to serve the nation in a dynamic manner.

University will focus more on knowledge creation through research and create suitable research environment with excellent infrastructure in every department. Focus will be more on publishing quality research work, which will help not only Indian society but will be accepted at international level as well.

Emphasis will be given towards Community Outreach Programmes for elderly women, socially and economically weaker women and children. Community engagement will be encouraged among students through internship programmes.

2025-2026

Keeping in sync with the rich heritage and culture of India, SNDTWU will promote Indian music and dance showcasing our mastery in this area as well. University will organize world class cultural events, festivals where young artists, can showcase their talents. Further, University will go for cultural exchange programmes at national and international level. University will focus on corporate communication training programmes, which is the need of today and tomorrow.

2026-2027

In the next five years SNDTWU proposes to be a citadel of education with excellence. The physical infrastructure will be upgraded, safe and technologically advanced, making it world class to attract more students nationally and internationally.

The strategic plan of SNDTWU focuses on all policies and approach based on Sustainable Development of teaching and learning, and research in the area of arts, science, technology, culture, engineering, and management. It shall continuously impart excellent academic knowledge; value based education and successfully implement the National Education Policy-2020.
